SOFTWARE ENGINEER

I'm a software engineer who is passionate about crafting software and loves building products that people love. I have a strong focus on customer satisfaction, accessibility, teamwork, and code quality. I actively engage in personal projects and volunteer in various tech communities.

SKILLS

- **Frontend**: JavaScript, React, Next.JS, HTML, CSS, Tailwind, Material-UI, Bootstrap
- **Backend**: Node, Express, Mongo, RESTful API, Firebase
- **Other**: Git, Github, VSCode, Testing, Scrum & Agile Development, Accessibility, OpenAI

EXPERIENCE

Grammerhub(Associate Software Engineer)   Miami,FL
Digital Meetup app for emerging tech talent   April 2023 - Present
- Collaborated with the development team to design, develop, and maintain web applications using React, JavaScript, HTML, Tailwind CSS; Along with AWS, MongoDB and MySQL databases.
- Implemented new software features and functionalities while following coding standards and best practices, which increased code readability for new developers by 30% and a 15% decrease in reported code defects.
- Provided technical leadership to teammates through coaching, code reviews, and pair programming.
- Resolved critical software defects and performance bottlenecks, contributing to a 60% reduction in customer-reported issues and improving overall system stability.
- Used AGILE process of development to ensure project work flow is done in an efficient manner consistent with industry standards.

Spirit Airlines(Quality Assurance Analyst)   January 2022 - August 2022
- Responsible for creation and maintenance of over 300+ manual test scripts
- Responsible for ensuring that quality issues and defects are appropriately identified, documented, tracked, and resolved
- Analyzed and reported bug defects to senior software engineers which increase accessibility and user engagement by 15%

TECHNICAL PROJECTS

SkillForesight AI - [Github](#) | [Demo](#)
AI helping students and career switchers find success
- Developed a comprehensive web application using React and integrated artificial intelligence for career exploration
- Utilized Node.js and Express for a robust backend handling data processing and AI integration
- Led the design and engineering efforts in the ironhack | Emerge Americas hackathon

Trending Movies - [Github](#) | [Demo](#)
A way to view and search for trending entertainment
- Created an engaging movie application using React, React Router, and integrated TMDB and OMDB APIs
- Users can explore trending movies and shows on a daily or weekly basis

Baller Bet- [Github](#) | [Demo](#)
Captivate users with a visually striking and user-friendly interface
- Designed an interactive sports betting landing page using React and Tailwind CSS
- Implemented an interactive pop-up for enhanced user experience

EDUCATION

Boca Code - Full-Stack Software Engineering Bootcamp (June 2021 - September 2021)
Self-Taught - Scrimba(Javascript and React Course)| FreeCodeCamp | Codecademy
